My dear Sir

Although I have not time to write you fully my impressions concerning your invention I send you these few lines to acknowledge receipt of your kind note of the 17<sup>th</sup> inst — and to thank you for your confidence in forwarding details.

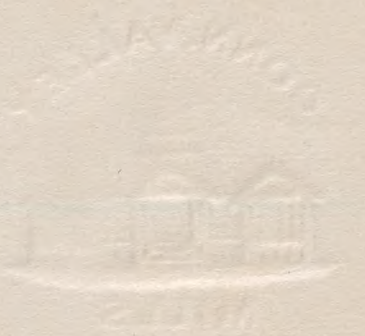

I get your idea perfectly from the diagram you have sent — and I may say that I have not tried the same method — and that it strikes me as feasible at the first glance — and if feasible I can see many ways of applying it to my form of Autograph Telegraph.

I am very busy just now arranging my professional affairs so as to admit of time for pursuing my telegraphic researches. I expect that all will be arranged by the end of this week.

I shall send you descriptive & diagrams of my Autograph

Telegraph — as soon as possible.

I have applied my invention to printing mechanisms such as Hughes' — and also to Sholes' & Glydder's "Type-Writer" — The American Patents for these were granted me without interference with Wm Gray.

In haste

Yours very sincerely

A. Graham Bell

P.S. I am to meet my partners towards the end of this week and shall communicate <sup>with you</sup> as soon afterwards as possible.

L. J. Stanley Esq.
